About me

I am **reliable**, **honest** and **commited**. I have a great curiosity and **learning capacity**, I am at all times trying to understand the way things work around me. I am **proactive** and I have **wide experience working in teams**, many times fulfilling the **communicator** and **mediator** roles. I am capable of **effectively project in the short and long terms** and also of thinking **quick solutions** or take in consideration when a **broader process** is required. Finally, I also can understand **business logics** and **quality standards**, abstract solutions and write clean, scalable, modular and reusable code following **good practices**.

Skills

HTML5 - CSS3 - CSS Modules - MaterialUI - Bootstrap - Tailwind - Styled Components - Javascript - Typescript -PHP - React - Next - Redux ~ Toolkit - Node - Express – Nest – MongoDB – Mongoose - PostgreSQL - MySQL – Sequelize - AWS - EC2 - S3 – Lambda - CloudWatch - SNS - SDK - Redis - Git - GitHub – Jira - Postman - Docker – RabbitMQ - Jest - Cypress – Cucumber - Clean architecture - DDD - EDD - GraphQL - Apollo – Storybook- Module Federation - Multi-zones

Developing experience

- ### @Tiendamia September 2023 ~

  Contact: Mercedes Vidal (TL) Email: merceditas.vidal@gmail.com

  Senior Full Stack developer position in an excellent working environment, with promotion of refinements and estimations to make **effective agile** work and expansion of knowledge and business logic. Varied work between Frontend and Backend, partly done in **PHP in Magento**, but mainly developing in **event-driven** with **testing automation clean architectures** in Nest.js with RabbitMQ and Jest. Frontend app development with Next.js, using Atomic Design and applying **SOLID rules** to improve best practices, finally **leading a microfrontend architecture project** with an **in-house developed design system**.

- ### Flexy June 2023 – August 2023

  Full Stack developer position at Startup, developing a web app for renting and selling real state online.

- ### StoryDots July 2022 – June 2023

  Contact: Guido Valente (COO) Email: gvalente@itcrowdarg.com

  Full Stack developer position at Startup with multiple apps related to the same business logic. Varied work between FrontEnd and BackEnd using **Typescript** and, at front, mostly React or **Vanilla JS** otherwise, and **many CSS frameworks** (pure CSS, Bootstrap, Material-UI, CSS-modules, emotion, StyledComponents), and, at back, **serverless solutions execcuted with AWS Lambdas** using a MySQL database with the Sequelize ORM. Also, the work was at great measure around APIs consumption and embed apps, because of the joint work with TiendaNube, Shopify and VTEX.
